

WP PLUGINS KC-DEV

Introducing KC Image Popup

BY — 24 JUL, 2026

KC Image Popup brings designed image popups to the KC-Dev suite.

FEATURES

- Popups are a post type under KC-Dev → Popups: pick an image, an optional click-through URL, and a trigger.
- Triggers: automatically on page load (with delay and once-per-session limit) or manually via the shortcode link.
- Targeting: home page, or a chosen set of posts/pages.
- Per-popup styling — overlay color and opacity, close-button color, image width and shadow — with an auto-generated, editable CSS block.
- Settings panel with usage guide under the KC-Dev admin menu.
- shortcode renders a link that opens the popup.
