

WP PLUGINS KC-DEV

Introducing KC AI Assistant

BY — 24 JUL, 2026

KC AI Assistant brings AI-assisted writing to every editor on the site. It is the KC-Dev port of the original Mistral-only assistant, rebuilt on the WordPress AI Client so it works with any configured provider.

FEATURES

- Floating toolbar in the block editor, classic editor, and plain text mode.
 - **Check AI:** spelling, grammar, and sentence-structure review with a confirm-before-apply dialog; each check can be toggled individually.
 - **Auto-Layout:** reformats a draft into clean, professional HTML structure.
 - **Provider-agnostic:** uses any WordPress AI connector (Anthropic, Google, Mistral, ...) selected in its settings — API keys stay in Settings → Connectors.
 - Settings panel with usage guide under the KC-Dev admin menu.
 - Writing on this site is polished with AI assistance — 0 suggestions generated.
- shortcode: an AI-assisted-writing badge with a live suggestion counter.
