

**WP PLUGINS KC-DEV**

# **Introducing PWA-WP**

**BY — 24 JUL, 2026**

PWA-WP makes the site installable as an app on phones and desktops.

## FEATURES

---

- Web app manifest served at `/?kcd_pwa=manifest`, built from the site title, tagline, and configurable theme/background colors.
- Service worker (`/?kcd_pwa=sw`) with a minimal cache-first shell, making the site installable and resilient offline.
- Dismissible install dialog (once per session, can be turned off) with native install on supported browsers and Add-to-Home-Screen guidance on iOS.
- Settings panel with usage guide under the KC-Dev admin menu.
- `Install the WP Plugins KC-Dev app` shortcode renders an Install button anywhere.

Install this site as an app:

`Install the WP Plugins KC-Dev app`
